

Moto 360 Camera

Getting Started Guide

Troubleshooting the Moto 360 Mod

[Back to Previous Page](#)

Troubleshooting the Moto 360 Mod

If you are experiencing issues with your Moto 360 Mod please ensure you have the latest 360 Camera software.

With the Moto 360 Camera attached go to Settings > Moto Mods > About this Moto Mod > Software updates.

My phone feels warm when taking 360 photos or videos, is this normal?

Yes, 4K 360 videos and high resolution 360 photos use considerable processing power and the heat is normal. Camera will automatically stop if the phone reaches unsafe temperatures.

Why does the screen appear to turn off after one minute of video recording?

Moto Camera dims the screen after one minute of video recording by design. The screen is not off and video is still recording, you can brighten the screen again by touching anywhere in the middle of the screen.

How can I hear the 3D audio, or I can't hear the 3D audio?

Please use headphones connected to your phone, or to a PC where you've uploaded the video to YouTube or Facebook and pan the video around to hear sound recorded from different directions.

Do I need to keep the lens cover on the Moto 360 Camera when I'm not using it?

Yes, it is very important to use the lens cover protect your lenses from getting scratched

Why do I see blurred areas or a halo on my images and videos?

Please clean the lenses with a soft, clean cloth before use to ensure there are no smudges on the lenses

Back to Previous Page

What apps support 360?

Google Photos (360 images and videos), Facebook (360 images and videos). YouTube (360 videos).

Apps like Twitter, Instagram, Snapchat, .. do not support 360 images and videos today.

You can share Google Photos links through any unsupported app, or alternatively create a tiny planet crop (Photo, crop, tiny planet) and share it as a flat image.

How can I livestream?

Back to Previous Page

How can I livestream?

What is Go Live?

Go live is a feature that allows you share live videos instantly on social media platforms such as facebook or youtube.

How do I use Go Live?

First, you must be using the [Moto 360 camera mod](#) for this feature to work.

Launch camera, touch menu  on the viewfinder screen, select Go live

You will be directed to the Moto Live Stream app on Play Store. Install the app and touch “open” to livestream.

If the “Go live” option is not available in modes, go to Play Store and search for “Moto Live Stream” and install the app (ensure the app publisher is “Motorola Mobility LLC”). You can launch this app from the app menu to go live. Moto Camera will be updated to add Go live at a later date.

Edit photos & videos - Moto 360 Camera

Back to Previous Page

How do I edit photos & videos?
