

# Voyager Legend Series Reset

Reset Sensors You may need to reset the sensors if they are not working as expected. • Wearing the headset, tap the Call button to test sensors. A talk time voice alert means sensors are working. A tone or lack of voice prompts means sensors need to be reset. •

The Smart Sensors on my Voyager Legend aren't working. Is there some way I can reset them?

If the Smart Sensors on the headset are not working, they may need to be reset.

First, test the sensors. To do so:

1. While wearing the headset, tap the Call button.
2. A talk time voice alert means sensors are working. A tone means the sensors will need to be reset.

To reset the sensors, charge your headset and place on a flat non-metallic surface for more than 10 seconds.
